

The Eco-Zone

- Provincial law calls for an ecological buffer around rivers and streams discharging from golf courses to lakes in the North River watershed, such as the stream on the 8th hole.
- These types of buffers allow for watercourses to traverse golf courses while maintaining their ecological integrity.
- Abrinord is a provincial organization responsible for the conservation of the North River Watershed.

What you can do:

- Do not enter the eco-zone for any reason.
- Be conscious of the natural environment as you play our course. Dunany's beauty deserves to be protected, and conservation is everyone's responsibility!
- See <http://www.abrinord.qc.ca/> for more information.
