Greens Committee Update: Turkeys on the Course

We've had quite a few sightings of turkeys around the course this summer, and we understand that their presence has raised some concerns among members. Chris Hart would like to reassure everyone that, for the most part, the turkeys have actually been beneficial to the course.

Earlier in the season, they helped control grub populations, and more recently, they've turned their attention to beetles. Both are pests that can damage turf, so their foraging has contributed to healthier fairways.

The fairway spraying program for 2025 is now complete. This year's treatment has already shown improvements over last year's, and we are optimistic that 2026 will continue the upward trend.

As the grub population declines due to both natural predation and the spraying program, we expect the turkeys to gradually move on.

Thank you for your continued support and understanding.

Volunteer Spotlight

For over 15 years, they've been the sharp minds behind the scores at our Men's, Ladies', Senior's, and Junior's championships. Rain or shine, from early morning tee-offs to the final putt, they're right there recording history in the making.

With very early mornings and very long days of number-crunching per event, they're true marathon scorers... and our tournaments wouldn't run the same without them.

Thank you, **Betty & Marilyn** - we're so lucky to have you!
